## OPTIMISED SPACE AND ERGONOMICS

For years, benching has been an efficient way to manage real estate compression. And while that still holds true, a "one size-fits-all" approach to benching has been typical, compromising worker efficiency and satisfaction. Today's workers and their employers

require solutions that support their specific job functions and work scenarios. Activa Bench enriches space and supports reduction of square metres without compromising worker's wellbeing by offering a variety of ergonomic solutions.
