

GRANORTE®
delivering nature

Our motto, "Delivering Nature" means that GRANORTE's products will contribute to the basis of a new culture of sustainable design and construction that will bring Nature closer to man's living.

who we are

and what we do

GRANORTE is a Portuguese family company, founded in 1972 to recycle the cork waste from the wine cork stoppers manufacturing industry. From the beginning we have dedicated our attention to product research and development, resulting on innovative production processes and technical excellence.

Our significant know-how in cork allowed us to develop into an expanding producer of technical solutions using cork. Today, GRANORTE is a leading sustainable flooring manufacturer, producer of thrilling environmentally responsible products, exporting to more than 40 countries around the world. One tradition was kept unchanged however: the quiet revolutionary way of promote ongoing, consistent, breakthrough creativity. This innovation culture and teamwork encouraging have been the basis of our success.

how we do it

It is our belief that only through QUALITY we will give to our customers the product they require and to cork the value it deserves. Our mission is to lead in the design, development and manufacture of the industry's most advanced cork products, exceeding our customers' expectations in quality, service and value. All our attention is focused on the success of our customers, offering a complete and technologically advanced product range and customized solutions, while maintaining superior customer service standards, delivering on time, every time. The Innovation capability and high standard of customer service have become GRANORTE's main trade mark.

Elected in 2005 by Deloitte the best Portuguese company in the area of wood, cork and furniture. SME LEADER Since 2008, recognizing the company's work as an example of excellence and quality, developing competitive strategies of growth and leadership. Processing about 10,000 Ton per year of cork raw material. Exporting 97% of the production to more than 40 countries around the world. 25,000 m2 covered area. Certified NP EN ISO 9001. Certified SYSTECODE. FSC® and PEFC Chain-Of-Custody Certified.

Habitat for Humanity International is a nonprofit charity. HFHI seeks to eliminate poverty housing and homelessness from the world and to make decent shelter a matter of conscience and action worldwide. Habitat has built and renovated more than 300,000 homes around the world, providing more than 1,5 million people with safe, decent, affordable shelter. Through the partnership with Habitat for Humanity, GRANORTE is donating cork flooring material to every new home built by HFHI in the Europe and Central Asia region.

cork, a renewable resource

Cork is the outer bark of the cork oak tree, which grows mainly in the Mediterranean region of the world. This tree has a life span of about 200 years. Each cork tree must be 20 to 25 years old before it can provide its first harvest of cork. After extracting the cork a new layer starts generating and nine years have to pass until a new harvest can take place. The cork harvesting is made in a sustainable manner and does not harm the tree which is never cut down or removed.

With the increasing concern for the environment, cork oak remains the only tree whose bark can regenerate itself after harvest leaving the tree unharmed. It is truly, a renewable, environmentally friendly resource. Furthermore, the cork oak tree has the remarkable capacity to retain carbon and a harvested cork tree fixates almost five times more carbon. This exceptional characteristic makes cork a naturally sustainable product and its use contributes to the preservation of a unique habitat in the world.

Portuguese cork forests drain 4,8 million tons of carbon dioxide from the atmosphere each year. Mediterranean cork forests represent a carbon sequestration of 5,7 tons CO₂ per hectare per year, about 14 million tons annually. Near 1,5 hectares of cork forest are enough to compensate for the annual carbon dioxide emissions of an average vehicle. Cork harvesting increases CO₂ capture and storage. Every harvested cork tree fixates between 3 to 5 times more carbon. The total annual production and harvesting of cork retains from the atmosphere the CO₂ equivalent of about 185.000 automobiles.

environmental commitment

GRANORTE recognizes that business leadership carries a responsibility to the environment and the world's forests. We contribute to the development of environmental solutions that conserve, protect and restore forests, supporting responsible forest management practices that both protect biodiversity and ecosystem integrity and result in long-term social and economic benefits to human communities.

Further to the Chain-of-Custody certification through FSC® and PEFC of our factory, we have established the following policy commitments to ensure the sustainability of our business and to promote the development of the markets for environmentally responsible forest products:

1. GRANORTE will give purchasing preference to wood and/or cork raw material from forests managed in a responsible way, preferably certified to FSC® or PEFC or a credible alternative standard.
2. GRANORTE will work with its suppliers to eliminate the purchase of wood and/or cork from endangered forests.
3. GRANORTE will ensure that its suppliers of wood and cork raw materials are in compliance with laws and regulations pertaining to their operations and that they are supplying legally and sustainably purchased wood and/or cork.
4. GRANORTE will ensure that the supply of forest raw material does not come from controversial sources such as:

- Forests operated illegally or in violation of civil and traditional rights;
- High Conservation Value Forests threatened by management activities;
- Forests in the process of conversion to plantations or non-forest use;
- Forests where trees are genetically modified;

5. GRANORTE will practice and promote the efficient and responsible use of wood and cork raw materials.

The mark of responsible forestry

GRANORTE business strategy is based on Sustainability. Becoming a member of the WWF's Global Forest & Trade Network is part of our continuing focus on the strategy for sustainable growth and commitment to increase the use of cork and wood from sustainable sources, helping to protect the world's forests.

why cork floors

Naturally sustainable alternative - Cork can be harvested from the same tree for about two hundred years and every harvested cork tree fixates between 3 to 5 times more carbon. The harvesting is made with minimal impact on the environment and no trees are cut down to bring you this product. Cork is the perfect environmentally friendly, renewable and sustainable material.

Comfort - Cork, as a natural product, warms and enriches any interior. With over 40 million natural "cushion cells" per cubic centimeter, cork is a natural sound and thermal insulator. Cork floors are beautifully quiet and comfortable underfoot, warm and pleasant to the touch.

Safety - Cork floors do not absorb dust and are resistant to bacteria and fungus. They do not cause allergies nor pose a risk to asthma sufferers. Adhesives and finishing products used in the manufacturing of cork floors are formaldehyde-free and Volatile Organic Compounds (VOC) emissions are not detectable.

Durability and easy maintenance - GRANORTE's advanced coating technology gives cork floorings a highly resistant and long-lasting protection even in high traffic environments. Due to the special factory finish, cork floors are not only durable but they require only minimal maintenance.

The list of benefits of GRANORTE cork floors really surprised me. The designs are eye-catching, it's comfortable underfoot, durable, and is the healthiest choice in floorings.

what's so special about our floors

As a result of our innovative thinking, our cork floating floors were the first to introduce many of today's "standard" features and they have exclusive characteristics:

- Superior installation system** GRANORTE was one of the first to present the industry's leading UNICLIC® profile in cork floatings.
- Superior joint protection** Application of a moisture-repellent agent to the cross-section of the profile.
- Better Surface Protection** GRANORTE was the first to present a multi-layer nano-technology finish in cork floatings.
- Highest grade fiberboard** The fiberboard used as the core layer complies with CARB phase II and has a higher density and resistance to moisture.
- Unique design** GRANORTE was the first to present the narrow plank and the beveled edges in cork floatings. Furthermore, we have the biggest selection of patterns, textural effects, colors and finishes of the industry.
- Lowest VOC's content** GRANORTE is the only producer with cork floatings approved GREENGUARD® Children & Schools.
- Highest safety** GRANORTE is the only producer using MICROBAN® antimicrobial protection in cork floatings.

Patented glueless fixing system for floor panels.

Embedded antibacterial and fungus protection using Microban® antibacterial technology.

Nano-Tech High Performance Finish with very high wear, impact, scratch and slip resistance.

Wear enhancement technology by embedding micro ceramic beads into the vinyl wear layer.

Waterbased two component finish with very high wear and impact resistance with a natural look-and-feel.

Indoor air quality certification for low-emitting interior building materials.

Hard cured oil finish for a natural wax-oil look-and-feel.

Kork-Logo certification of the German Cork Association.

Low swelling and moisture resistant High Density Fibreboard.

International symbol used to identify products made of genuine cork

Edge impregnation for improved moisture resistance.

Formaldehyde-free agglomeration technology.

Micro-bevelled edge aesthetic enhancement.

Certification for safety and energy-saving performance

technical data

[illegible]

All GRANORTE floors are easy to maintain. However, as any kind of floor, it requires continuous and proper cleaning and care so that the surface protection and the attractive appearance of the floor are maintained.

Preventive care

The floor must be kept clean. Never use cleaning products with abrasive ingredients or solvent based.

Furniture legs should have protective pads to avoid scratches. Furniture and other heavy objects must be placed carefully.

A doormat should be laid inside the front door to help protect against dirt and sand.

Chair castors should be of type W (soft). For additional protection, polycarbonate mats under castor chairs should be used.

Avoid sharp or pointed objects with concentrated weight such as high heels on your cork floor.

Prolonged contact of plasticizer-containing material (e.g. rubber, latex, plastics...) with the varnish may cause non-reversible stain of the floor.

Cork is a natural product and may tend to fade when exposed to sunlight over long periods of time. Use blinds or curtains to prevent cork fading by direct solar radiation.

Cleaning

GRANORTE floorings must be cleaned regularly with a mop, hair broom or vacuum cleaner. Dust and dirt behave like sanding paper and are thus to be removed immediately. If necessary (heavier soiling) the floor can be damp-mopped using an appropriate cleaning product.

Maintenance

Maintenance caring can become necessary from time to time to refresh the protective layer. First clean your floor and then apply a thin layer of a recommended maintenance product.

Please observe the particular maintenance instruction for your floor. For the correct use follow the instructions on the packaging labels of each product, as well as the information from technical data sheets.

Attention

GRANORTE floorings are made with high quality, natural materials and should be handled accordingly. In spite of all due care given during manufacturing, there will be variations in appearance (colour, gloss, and texture). This should be verified before laying the floor, distributing the tiles/planks in a way that variations are not striking.

Cork (as wood) may change colour when exposed to sunlight over long periods of time.

Although every effort has been made to ensure accuracy during the production of this catalogue, GRANORTE disclaims potential product changes and possible print errors. The product photos may not accurately match the real colour and texture of the finished product.

Only the Company GRANORTE - Revestimentos de Cortiça, Lda. is FSC® certified. Only the Company GRANORTE - Revestimentos de Cortiça, Lda. is PEFC™ certified.
