## MONOCHROME™

Ellsworth Kelly, Frank Stella and Mark Rothko all believed in the undeniable, in your face, power of color. Now with an amazing new solid in our Convert™ platform – Monochrome is making believers of us all. 64 colors ranging from bold to neutral provide unlimited options that work well on their own, mixed together or combined with other InterfaceFLOR products. And not only is Monochrome versatile, it's made from up to 75% recycled content. So channel your inner artist with vivid saturated color from all points around the color wheel, because with Monochrome from InterfaceFLOR...your masterpiece awaits.

Through our ReEntry® 2.0 program and a partnership with our fiber suppliers, we are now able to recycle type 6 and 6,6 nylon into new type 6 and 6,6 nylon. Our own GlasBac® backing and similar competitor backings are recycled into new non-virgin PVC backing through our Cool Blue™ backing technology.

At InterfaceFLOR this results in Convert™ — a groundbreaking new design platform for modular carpet that is designed and manufactured with a full spectrum of post-consumer content yarn. Monochrome, a Convert style, features a minimum of 32% post-consumer recycled content, and a minimum total recycled content of 63%.

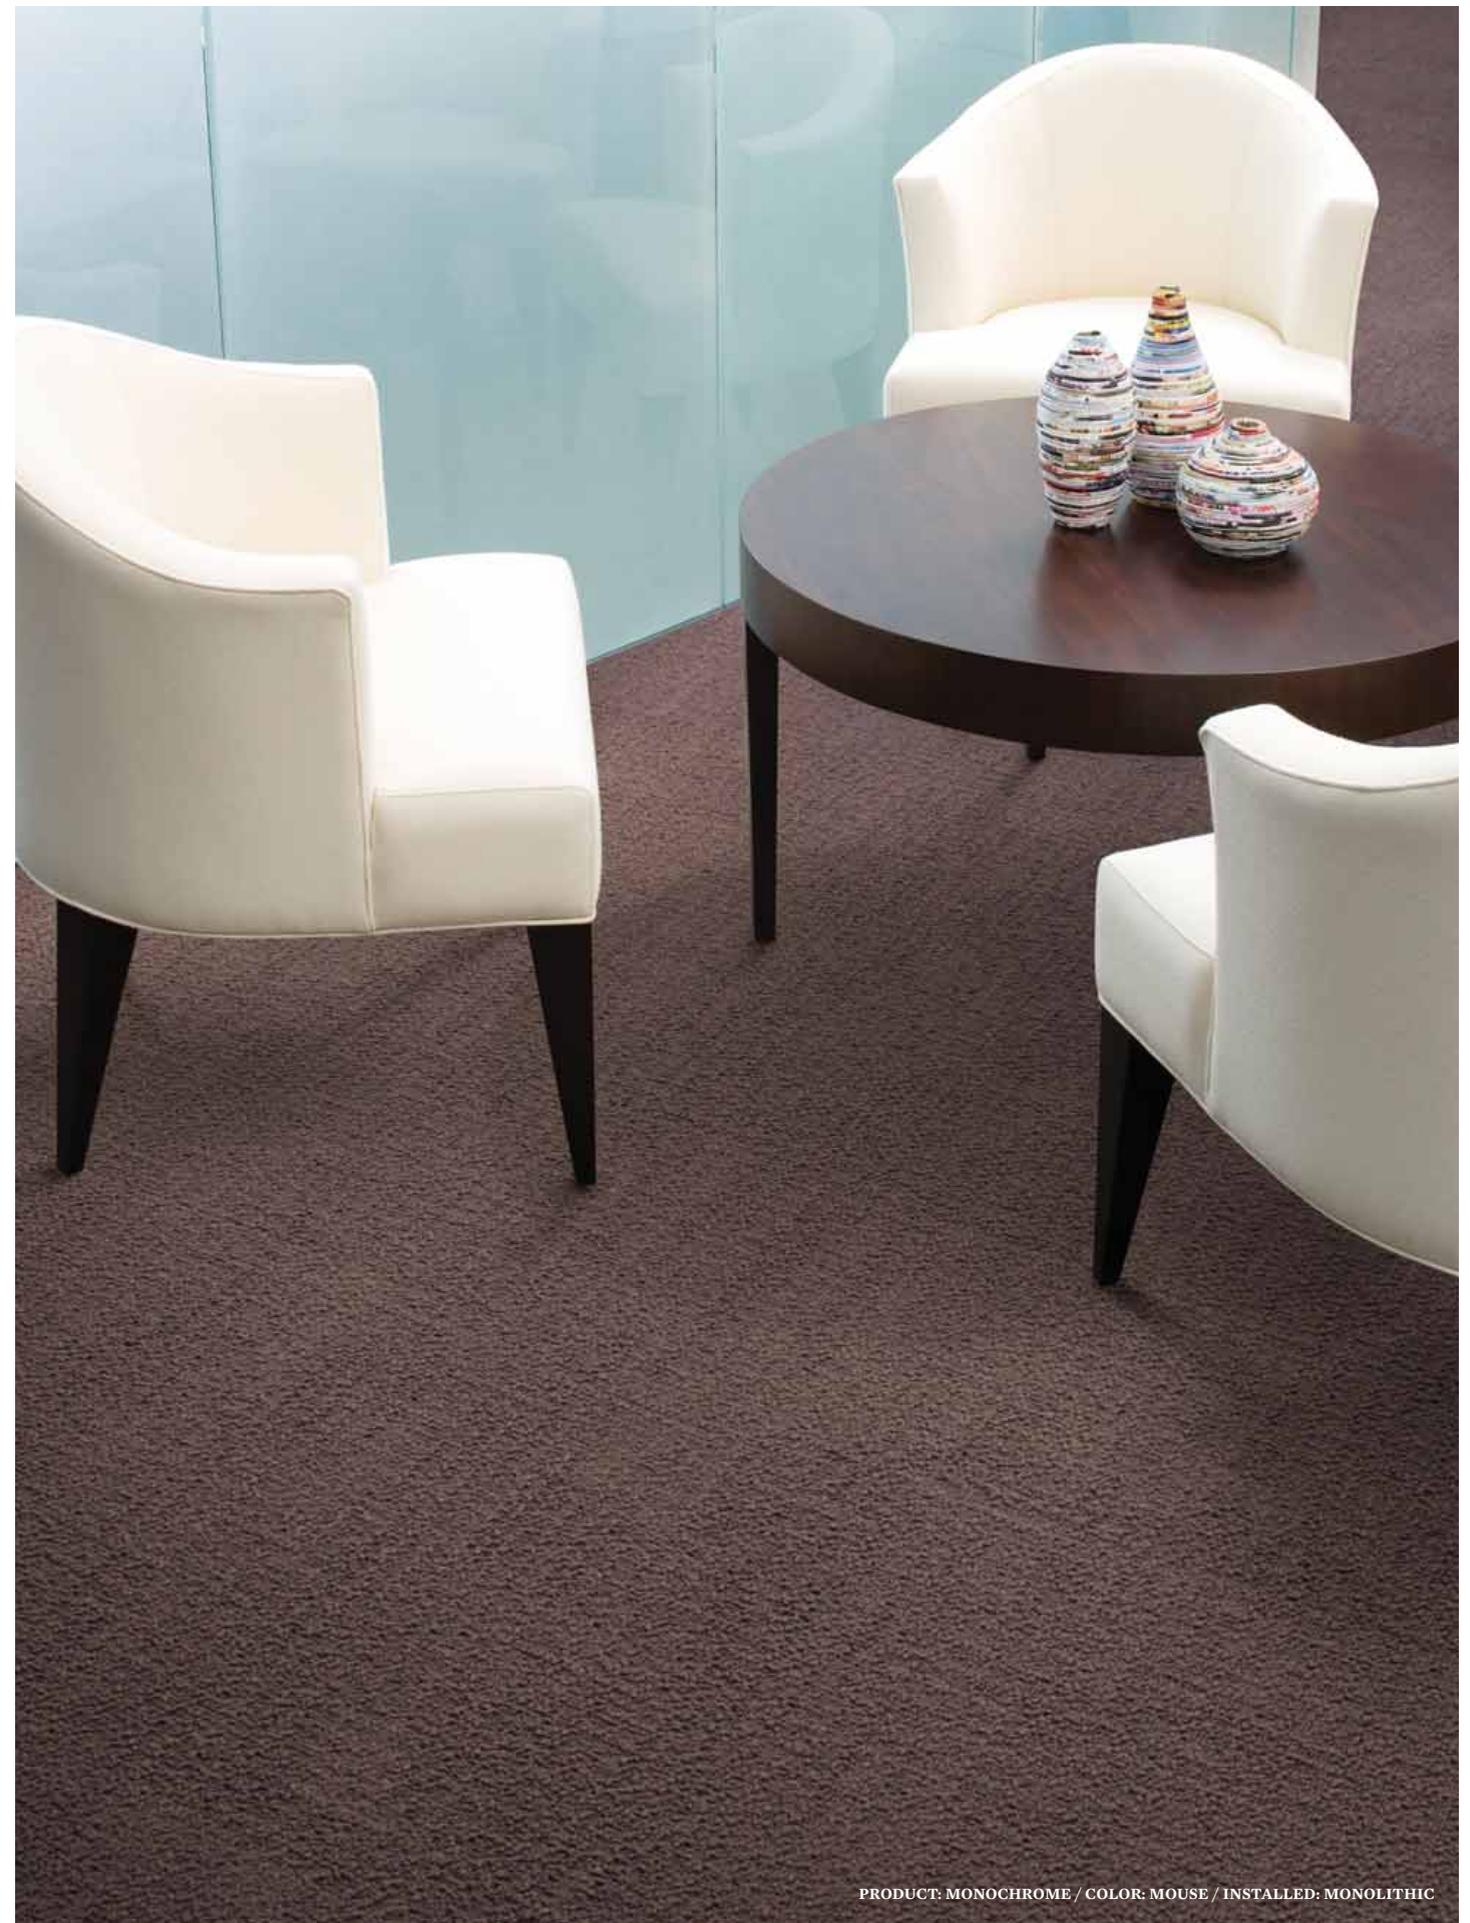

*Printed with UV inks on 100% post consumer waste (PCW) fiber manufactured using wind power.*

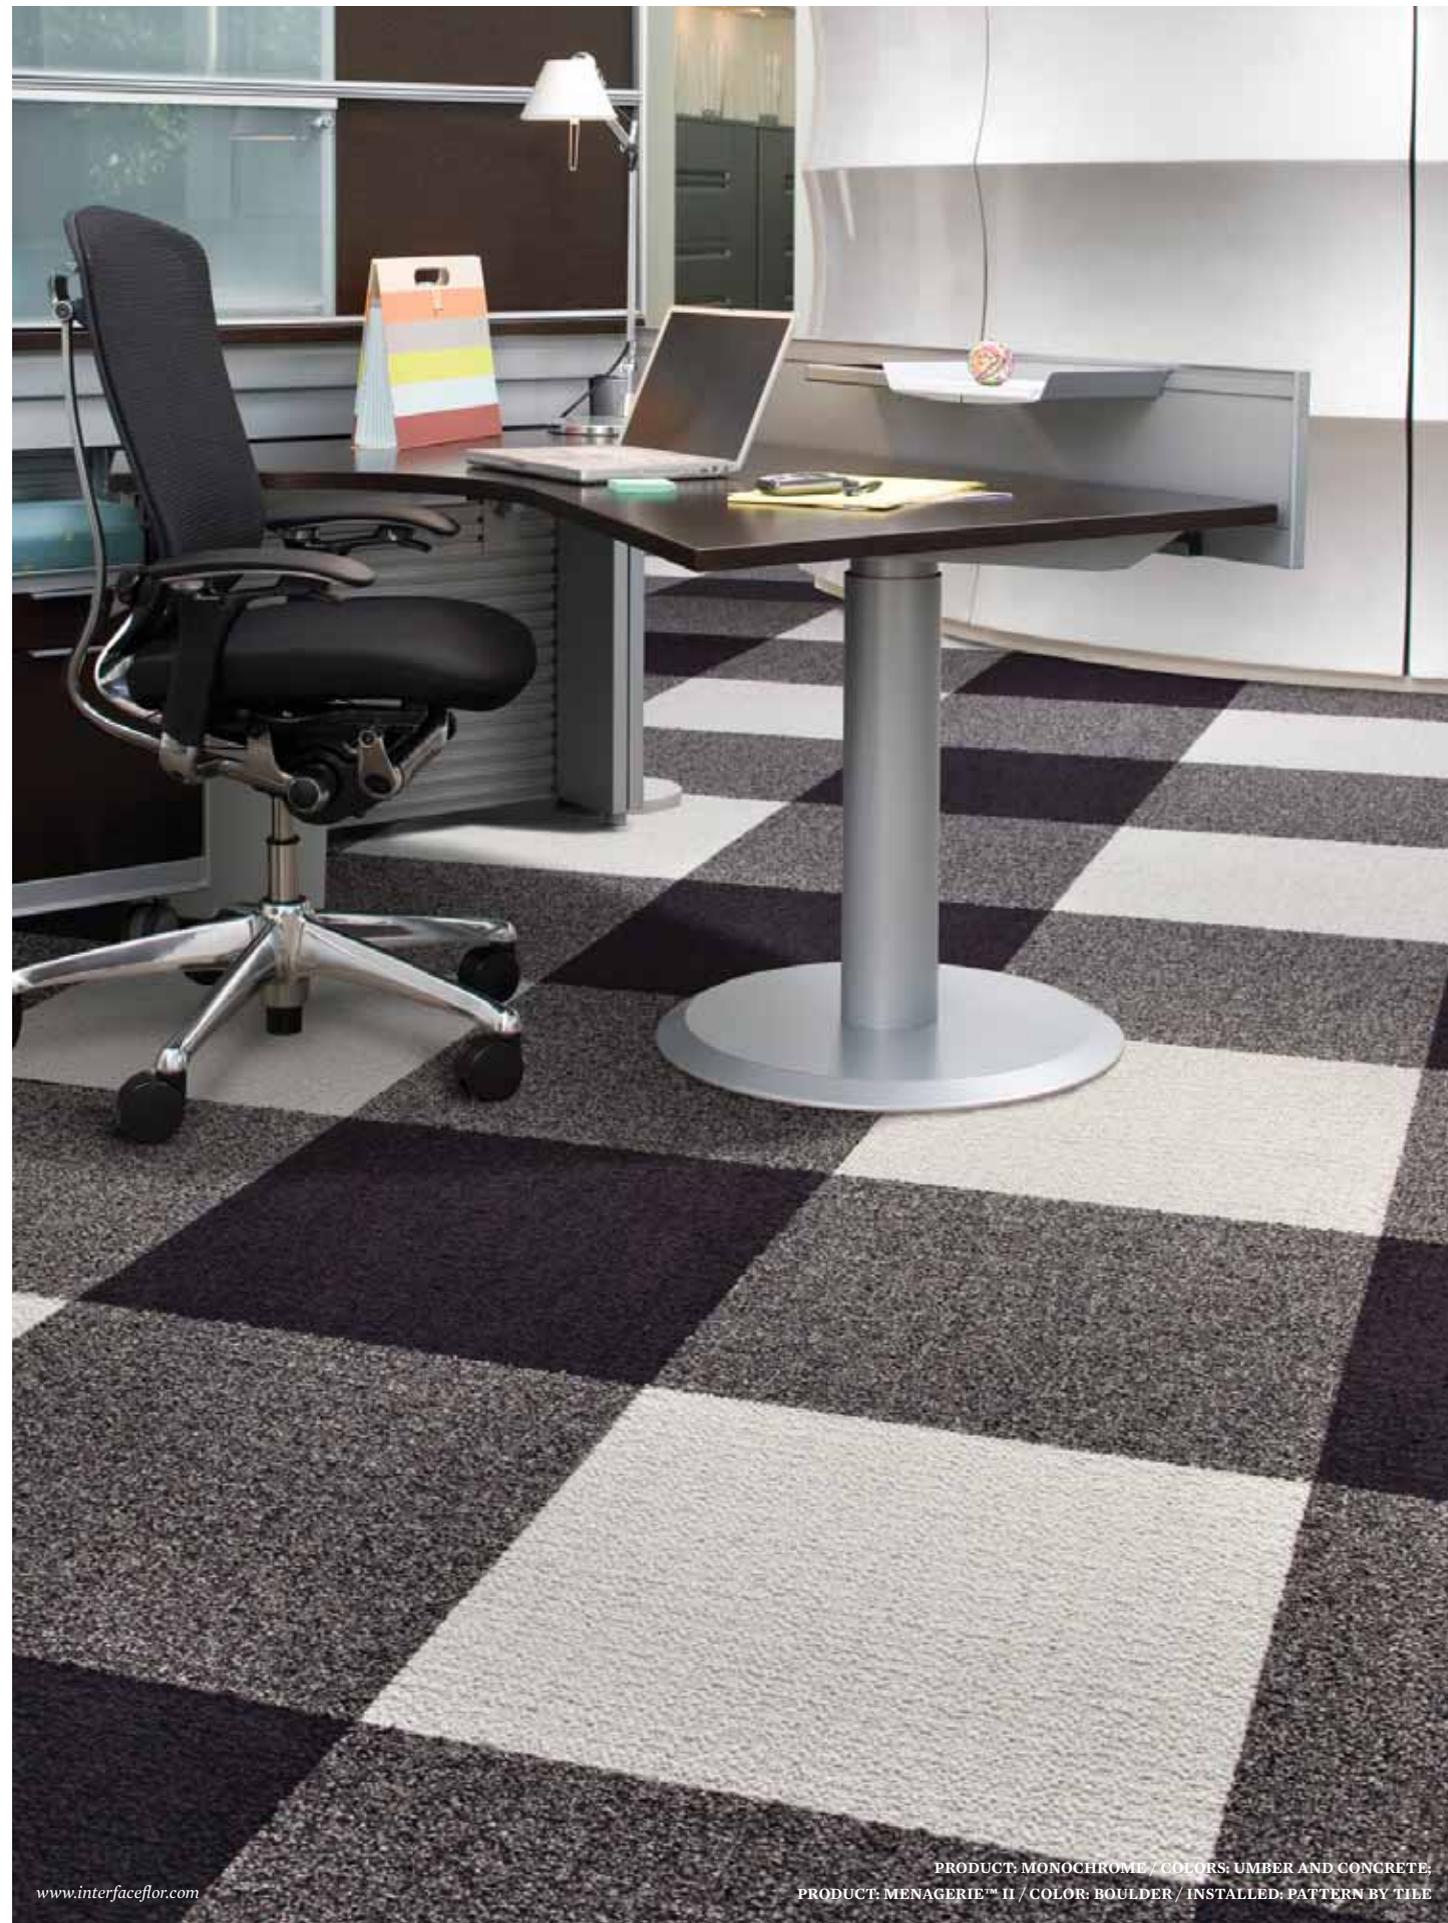

*We have tried our very best to accurately represent product colors. However, due to the nature of printed materials, color of actual products may vary slightly. Please request a sample to see actual product color.*

# Specifications

Production specifications are subject to normal manufacturing tolerances and may be changed without notice. Slight variation in color among different production lots are normal and should be considered in the overall installation plan. Products covered by manufacturer's written warranty only. All other warranties, including without limitation any implied warranties of merchantability or fitness for particular purpose, are hereby disclaimed. Contact your representative for written warranty information. Recycled content calculations are based on historical averages by total weight of the product. We update our recycled content information and other environmental data regularly to reflect changes and advancements in our technology. Post-consumer content comes from reclaimed carpet.

# Why Our Modular Carpet?

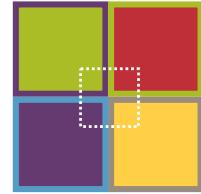

## COOL CARPET™

Help Stop Global Warming and Earn a LEED® Innovation Credit. ALL InterfaceFLOR modular carpet sold in North America is third party verified climate neutral Cool Carpet™. Cool Carpet zeros out all greenhouse gas (GHG) emissions associated with the entire lifecycle of your carpet. And climate neutral verified Cool Carpet may be eligible for a USGBC LEED Innovation Credit.

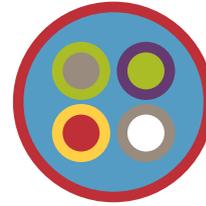

## MODULAR CARPET TILE

*Performance and Flexibility.* InterfaceFLOR's standard backing systems set the industry standard for modular performance. Tiles stay on the floor with no upcurl, no tapping and no rippling effect, yet are easy to selectively replace. Our modular carpet is also easier to handle, install and maintain than bulky roll carpet. And, it installs with less waste so you save time and money – 3-4% for typical modular carpet compared to an average waste factor of 14% for traditional roll carpet.

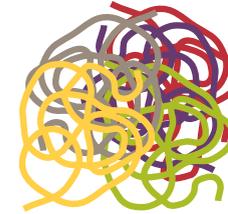

## TACTILES®

*No Glue Installation.* Our revolutionary TacTiles® installation system eliminates the need for glue, adhering tiles securely together to form a floor that “floats” for greater flexibility, easier replacement and long-term performance. The result? Less mess, less waste and virtually no VOCs, not to mention an environmental footprint that is over 90% lower than that of traditional glue adhesives.

## INTERSEPT®

*Mold Protection.* Our proprietary antimicrobial preservative, Intersept, protects our modular carpet against mold growth and odor-causing bacteria – guaranteed. Intersept treated carpet, with proper maintenance, shows no mold or bacterial growth when tested per the ASTM E2471 Standard Test Method. Intersept is low in toxicity, water insoluble and contains no arsenic, heavy metals, phenols or formaldehyde.

## ReENTRY® 2.0

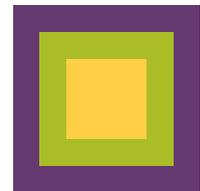

*Recyclable is Now a Reality.* Our ReEntry 2.0 program uses patent pending technology that gives us the ability to cleanly separate the face fiber and backing of nearly any carpet type. Separated type 6 and 6,6 nylon are recycled into new type 6 and 6,6 nylon, while separated GlasBac® and similar competitor backings are recycled into new non-virgin PVC backing using our Cool Blue™ technology. At InterfaceFLOR, this results in Convert™ – a groundbreaking new design platform for modular carpet manufactured with a full color spectrum of post-consumer content yarn.

## SUSTAINABLE CHOICE

*Environmental Responsibility.* InterfaceFLOR is the industry's first to earn an EPD (Environmental Product Declaration), which evaluates consistent factors based on full lifecycle assessment (LCA). We achieved an EPD based on our Convert products that offer never before seen levels of post-consumer content and illustrate our commitment to reducing virgin raw materials and taking responsibility for products at their end of use.

In addition, all InterfaceFLOR products with GlasBac®RE backing meet the Platinum level of the NSF/ANSI 140 Sustainable Carpet Assessment Standard (SCAS). GlasBac or NexStep® backed products meet the Gold level. All may contribute toward a USGBC LEED Innovation Credit.

## SAMPLES

Order samples at [www.interfaceflor.com](http://www.interfaceflor.com). You'll receive email order confirmations, 24/7 access to order status and more. Not near a computer? You can also request samples by calling one of the numbers below.

## INTERCIRCLE™ SAMPLE RETURN

Help us close the loop on the carpet sampling process. Through our InterCircle Sample Return program, sample materials stay out of the landfill and are re-used as samples until it is time to recycle them into new carpet. By reducing sample production material and diverting old materials from the landfill, we can reduce our overall environmental footprint.

Call 1 877 605 1500 (U.S.) or 1 866 398 3192 (Canada) to order a sample return bag with a prepaid return label.

## THIRD PARTY CERTIFICATION

cool carpet™

carpetree™ EPD

Cool Carpet™ – Our third party verified carbon offset program zeroes out all greenhouse gas (GHG) emissions associated with the entire lifecycle of your carpet.

Sustainable Carpet Assessment Standard (SCAS) – The only carpet sustainability standard in North America that evaluates the environmental impact of carpet for its entire lifecycle.

CRI Green Label Plus – An independent testing program that identifies carpet and adhesives with very low emissions of VOCs to help improve indoor air quality.

CARPETree™ – InterfaceFLOR Brazil's program funds the planting of one tree in a reforestation program for every 25 m<sup>2</sup> of carpet it sells.

Environmental Product Declaration (EPD) – A statement of product ingredients and environmental impacts over the entire life cycle of a product. A comprehensive life cycle assessment (LCA) is performed to ISO standards to develop an EPD, after which both the EPD and LCA must be third party verified.
